First of all we take this opportunity to convey our highest gratitude and sincere greetings!

The Government of Gujarat took an exemplary initiative and established the World's First Forensic Science University viz: Gujarat Forensic Sciences University at Gandhinagar with the sole objective of providing skilled and trained man power to various Investigative and Security Agencies of the country and the world. The Establishment of this highly specialized University was the vision and the dream of the then Hon'ble Chief Minister of Gujarat and the present Hon'ble Prime Minister of India Shri Narendra Modi. The University started functioning in the year 2009, with five specialized academic programs having the strength of around 100 students. The Government of Gujarat allotted the land admeasuring 50,000 sq. mt. in Gandhinagar on which highly sophisticated and state of the art campus has been constructed. This campus is unique in its kind having certain special facilities like: Ballistic Research Center, Cyber Defense Centre, state of the art working laboratories, Solar Power System, Auditoriums, Hostels, Guest House, etc.

Since, this is the only University of its kind in the world, many countries approaching the University for necessary collaborations in the area of training, education and research. The University has made MoUs with as many as 70 National / International Organizations of repute. Presently, the University conducts 45 highly specialized and unique kind of academic post graduate programs having more than 1700 students, including sizable number of foreign students.

GFSU also plays vital role in strengthening Criminal Justice Delivery System by imparting training to the officials of the investigation and judiciary system. Taking into consideration the acute need of providing training to the officers of Investigating and Security Agencies of the country and abroad, specially designed training programs have been launched by the University. Till today, around 6000 officers of various agencies have been imparted training including around 500 officers from countries like: Nepal, Bangladesh, Mozambique, Kenya, Myanmar, Maldives, Rwanda and others. The topics of training include advanced methods of investigation, methods of detection and prevention of crimes, Methods of Psychological interrogative, investigation of white collar crime, investigation of Cyber Crimes, Wildlife Forensics, Rail Forensics, Homeland Security, Post Blast Investigation Narcotics, Forensic Accounting etc.

With an aim to promote research in the areas of Investigation and Security, the University during last five years has organized more than 30 National and International level Conferences/Seminars, made 350+ Publications, given recognition to 10 Research Institutions, in addition to getting three patents of specific research outcomes. Forensics is a developing and emerging area in India and in many other countries. Therefore, the Governments of various states in India and outside were in need of either upgrading their existing forensic facilities or were interested in establishing new forensic facilities in their countries / states. The University undertook this task and started providing consultancy to various states and countries in this regard which mainly include Delhi and Karnataka state Forensic Science Laboratories and Central Forensic Science Laboratory of Central Bureau of Investigation and a proposal for the establishment of Forensic Science Laboratories at Rwanda and Ghana is under correspondence. In order to provide on the spot assistance in the investigations of varieties of crimes, the University has developed a specially designed Forensic Investigation Van equipped with all sophisticated kits and tools. The states like Delhi, Maharashtra and Gujarat have acquired these Vans.

Thus, the University has made many strides in a short span of 7 years and has gained special recognition not only in the country but also in the world through its remarkable performance.
